

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	5 July 2026
Team ID	
Project Name	Book A Doctor
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration & Auth	Registration through Form (Name, Email, Password) Login via Email & Password Logout functionality
FR-2	User Dashboard (Patient)	View approved doctors Book appointments View appointment history Apply to be a doctor
FR-3	Doctor Dashboard	View upcoming appointments Approve or Reject appointments View patient details
FR-4	Admin Dashboard	Manage Users (View all) Manage Doctors (Approve/Reject applications) View all system appointments
FR-5	Notifications	Real-time / In-app notifications for appointment status changes and application updates

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The interface must be intuitive, modern, and responsive across desktop and mobile devices. (Built with React & modern CSS)
NFR-2	Security	Passwords must be hashed. API routes must be protected using JWT (JSON Web Tokens).
NFR-3	Reliability	The system should gracefully handle database errors and provide clear feedback to the user on failures.
NFR-4	Performance	API responses should be fast (under 500ms). The frontend SPA (Vite) should load quickly.
NFR-5	Availability	The application should be designed to run continuously. (Currently running locally, but architecture supports cloud deployment).
NFR-6	Scalability	The MERN stack architecture allows for horizontal scaling of the Node backend and scaling the MongoDB database.
